

Dear Senator:

Pulmonary fibrosis (PF) patients and their families depend on the patient protections that the Senate is considering eliminating by passing the BCRA.

Our community has identified the following specific risks in the proposed legislation:

- Decreased support for, and access to, oxygen
- Decreased access to novel therapies for PF
- Increased costs for Americans age 50-64
- Reduced benefits limiting access to comprehensive care and treatment
- Significant reduction in Medicaid funding, leading to loss of, limited access to, or prohibitive costs of health care coverage for millions of Americans

The BCRA brings back annual and lifetime caps, limitless out-of-pocket costs and inadequate coverage by rolling back essential health benefits.

This legislation would be devastating for individuals with pulmonary fibrosis.

I am asking you to oppose the BCRA.

Thank you for your time and consideration.
